

Introduction

- * Moral and legal implications
- * Effectiveness
- * Ethical implications
- * Cost-effectiveness
- * Mental health sector

Moral and legal

- * Right to health (article 12 ICESCR)
- * Obligation to fulfill toward third states
- * Obligation can be nuanced
- * Moral implications:
- * Brain drain

Effectiveness

- * Programs can be beneficial
- * Proper infrastructure required
- * Dependent on resources
- * Therefore affected by budget
- * Lack of accessibility

Ethical implications

- * Global Health Ethics
- * The white-savior problem
- * Voluntourism
- * Guiding principles
- * Learning from worst practice

Cost-effectiveness

- * Lack of research
- * Overly targeted aid
- * Leads to neglect
- * Coordination required
- * Local control of funding

Mental health

- * Disorders prominent
- * Cultural competence training
- * Need for therapeutic alliance
- * Workload-related stress
- * Resource-constrained settings

How are international healthcare training programs a solution for healthcare staff shortage in developing states?

Team members: Filip Björkqvist (Economics & Business Economics), Sarah Eggen (Dutch Law), Catalina Keuser (Biomedical Sciences), Lennart Quast (Psychology), Jakob Seul (European Studies) and Sangwoo Yu (Business Analytics)

Supervisor: Mehrdad Seirafi
